<b>23 What did you like most about this course?</b>		
the professor is really smart and really good		
I like the subject in whole, Detection and Estimation of unknown signals with what ever limited data you have about it. It is a very interesting subject.		
I am a research student and the course content is very relevant to my research. The course contents were always put in perspective. The grading system was unique since the instructor met all the students one-on-one which allows clearer communication of ideas. The projects were good.		
The teaching style is excellent!		
Tough course. Covered important topics. Special topics cevred at the end were very appropriate and helpful. Teaching method was excellent and helped understand. Covered the most difficult of topics, but kept in mind the fundamentals and applications.
